

Seminole County Schools
Title I Supplementary Educational Services for SY 2009

The following chart lists service providers approved by the Georgia Department of Education with a brief description of their services and requirements. They have been approved by the Georgia Department of Education to provide Supplementary Educational Services to students in Seminole County Middle/High School. Information about rights and responsibilities of parents of eligible students is contained in the cover letter attached. Additional information and requirements are available from the contacts by telephone, e-mail, or Internet websites listed. The system will sponsor a Provider Fair to enable parents to meet representatives of the companies and obtain additional information; however, not all vendors attend such events. Parents interested in specific providers are responsible for contacting the provider for complete information in order to make an informed decision.

Any SCMHS student eligible for free or reduced price lunches is eligible for these after-school tutorial services for reading/language arts and mathematics. The ratio of students to teachers is limited to 8 to 1. Some vendors provide web-based instruction.

Seminole County Schools has for a number of years provided after-school remediation classes for any student needing additional help in reading/language arts or math. Class sizes have been limited to 12 students for each teacher. The system continues to provide these classes as an option.

Parents of eligible students may select from any of these options.

If any of the following providers are selected, service may be offered only if conditions specified by the provider are met. For example, some require Internet access. Most require a minimum number of students to enroll to offer classes.

Parents of eligible students interested in receiving services from SES vendors should register using the registration form provided. Completed forms should be submitted to the guidance office at Seminole County Middle/High School no later than September 5, 2008, to plan for services.
